

ICD-11 Morbidity tabulation list

The list for international statistical tabulation of morbidity has been compiled based on WHO reporting requirements (including Sustainable Development Goals (SDGs)) and input from the WHO-FIC experts.

The morbidity tabulation list has been generated programmatically based on the current version of ICD-11

The output is presented in Microsoft Excel containing these 10 columns:

- Column A displays the morbidity tabulation list number
- Column B provides the explanation
- Column C lists included entities, ranges, or blocks with their corresponding codes
- Column D shows the URI for included entities, ranges, or blocks
- Column E lists excluded entities, ranges, or blocks with their corresponding codes
- Column F shows the URI for excluded entities, ranges, or blocks
- Column G lists the included morbidity tabulation list numbers
- Column H lists the excluded morbidity tabulation list numbers
- Column I displays the tags
- Column J contains all codes that correspond to the tabulated entity in Column B (and is intended for programmatic use)

For example:

	A	B	C	E	J
1	Value Set Name	Explanation	Included Entities	Excluded Entities	Expanded codes
2	Mb1	Cholera	1A00 - Cholera		1A00
219	Mb218	Other diseases of stomach and duodenum	DA40-DA7Z - Diseases of the stomach or the duodenum	DA60-DA63.Z - Ulcer of stomach or duodenum	DA40.0,DA40.1,DA40.2,DA40.3,DA40.4,DA40.5,DA40.Y,DA40.Z

- Mb1 – Cholera - includes 1A00 Cholera - does not exclude any other codes – expanded code is (exclusively) 1A00
- Mb218 – Other diseases of stomach and duodenum – include DA40-DA7Z Diseases of the stomach and duodenum, but exclude DA60-DA63.Z Ulcer of stomach or duodenum – expanded codes are all listed in the column J
